

# Coronavirus (COVID-19): Our Commitment to Your Safety

## ADVANCED PT is a ONE-ON-ONE clinic for your SAFETY

Our top priority is ensuring a safe and secure environment for both our team members and our patients. Therefore, we are closely monitoring the latest news reports regarding Covid-19 (Coronavirus). We are taking great measures to protect our team members and patients from the spread of COVID-19. Advanced PT has always been a one-on-one clinic and have large clinics for social distancing with private rooms to serve your healthcare needs safely. We have dedicated staff for sanitizing our facilities.

### CONTINUED CLEANLINESS

We have always, and will continue to:

- Require our team members to deeply clean all tables and equipment after each use.
- Provide handwashing stations/hand sanitizer that meets the CDC requirements for antiviral disinfectant.
- Perform continual disinfecting by dedicated staff and nightly deep cleaning of each clinic.

### ADDITIONAL STERILIZATION

We also have dedicated staff members to increase the frequency and depth of clinic sterilization, which includes:

- Using EPA-registered disinfectant that qualifies under the EPA's emerging viral pathogen program for use against SARS-CoV-2, a coronavirus that causes COVID-19.
- All high-touch point areas: light switches, doorknobs, faucets, elevator buttons, chair handles, equipment, tables, etc.
- Each and every office space in all facilities: all computer mice, keyboards, telephone handsets, keypads, desktops, etc.
- All bathrooms: all surfaces, toilet seats, door handles, faucets, dispensers, etc.

### TEAM MEMBER AND PATIENT GUIDELINES

Per CDC guidelines, we are also requiring all team members, and are asking the same of all patients at our clinics, to:

- Wash their hands and/or sanitize after each interaction with any individual, including but not limited to physical therapy treatment.
- Avoid close contact with people who are sick.
- Avoid touching your eyes, nose, and mouth.
- Cover your cough or sneeze with a tissue, then throw the tissue in the trash.
- Wash your hands often with soap and water for at least 20 seconds, especially after going to the bathroom; before eating; and after blowing your nose, coughing, or sneezing.
- If soap and water are not readily available, use the CDC-recommended hand sanitizer – remember that CDC recommends hand sanitizer must cover all hand surfaces for 20 seconds.
